David,

Mike is out of office so I would need your authorization to release the drawing.  
Thanks,

Marc,

In your spare time, could you create an MKYD100S dwg similar to MKYD6185S dwg. I believe this can be legitimately categorized as "Shop Support". The attached information from Linda should help.

Thanks,  
David

If we make the parts out of Kydex 100, there is no burn certification to do since this is the approved material on the drawing and Transport Canada has already accepted this material for this application. What I told Daryl is that if we decide to change the material, then we will have to perform burn certification.

Ok, so Transport Canada want to purchase a D3097-3 or -5 whatever....David, I heard Daryl talked to you about this, will we have to get this burn tested?
